Workflows for Science and Engineering

David Abramson

Director, Research Computing Centre

rcc.uq.edu.au

Introduction

- > Some Science and Engineering Optimization Problems
- > The Nimrod tool family
- > Scientific Workflows
- > Interacting with designs
- > Towards data intensive workflows
- > Conclusions

Some Science and Engineering Optimization Problems

rcc.uq.edu.au

Air pollution Cope, Victorian EPA (in 1990)

rcc.uq.edu.au

Wildfires

Lynch, Beringer, Uotila Monash U, AU

Aerofoil Design

Kipouros, Cambridge, UK

- > Geometry management using Free Form Deformation – 8 design variables
- > Evaluation of the aerodynamic characteristics, C_l , C_d , and C_m coefficients using Xfoil
- > Investigation of the lift to drag trade-off subject to hard geometrical constraints to the thickness of the airfoil at 25% and 50% of the chord (in order to maintain practical significance)

Cardiac Science

Sher, Gavaghan, Rodriguez, Oxford
Mcculloch, Mihaylova, Kerckhoffs, UCSD

- > Heart disease still leading cause of death
- > Understanding the underlying physiological mechanisms is cheaper and faster when experimental studies are performed together with mathematical models & computer simulations
- > Studying pathologies
- > Developing & Testing drugs

Micromixer optimization

Kipouros, Cambridge, UK

> Microfluidics

- > 10⁻⁹ to 10⁻¹⁸ litres amounts of fluids
- > Gaining importance in various fields

> Micromixer deals with mixing fluids in the smallest scale

> Active vs. passive

$$s \geq 2r + 1$$
$$s \leq 34 - r$$

Electro-chemistry

Bond, Gavaghan: Monash, Oxford

The Nimrod Tools Family

rcc.uq.edu.au

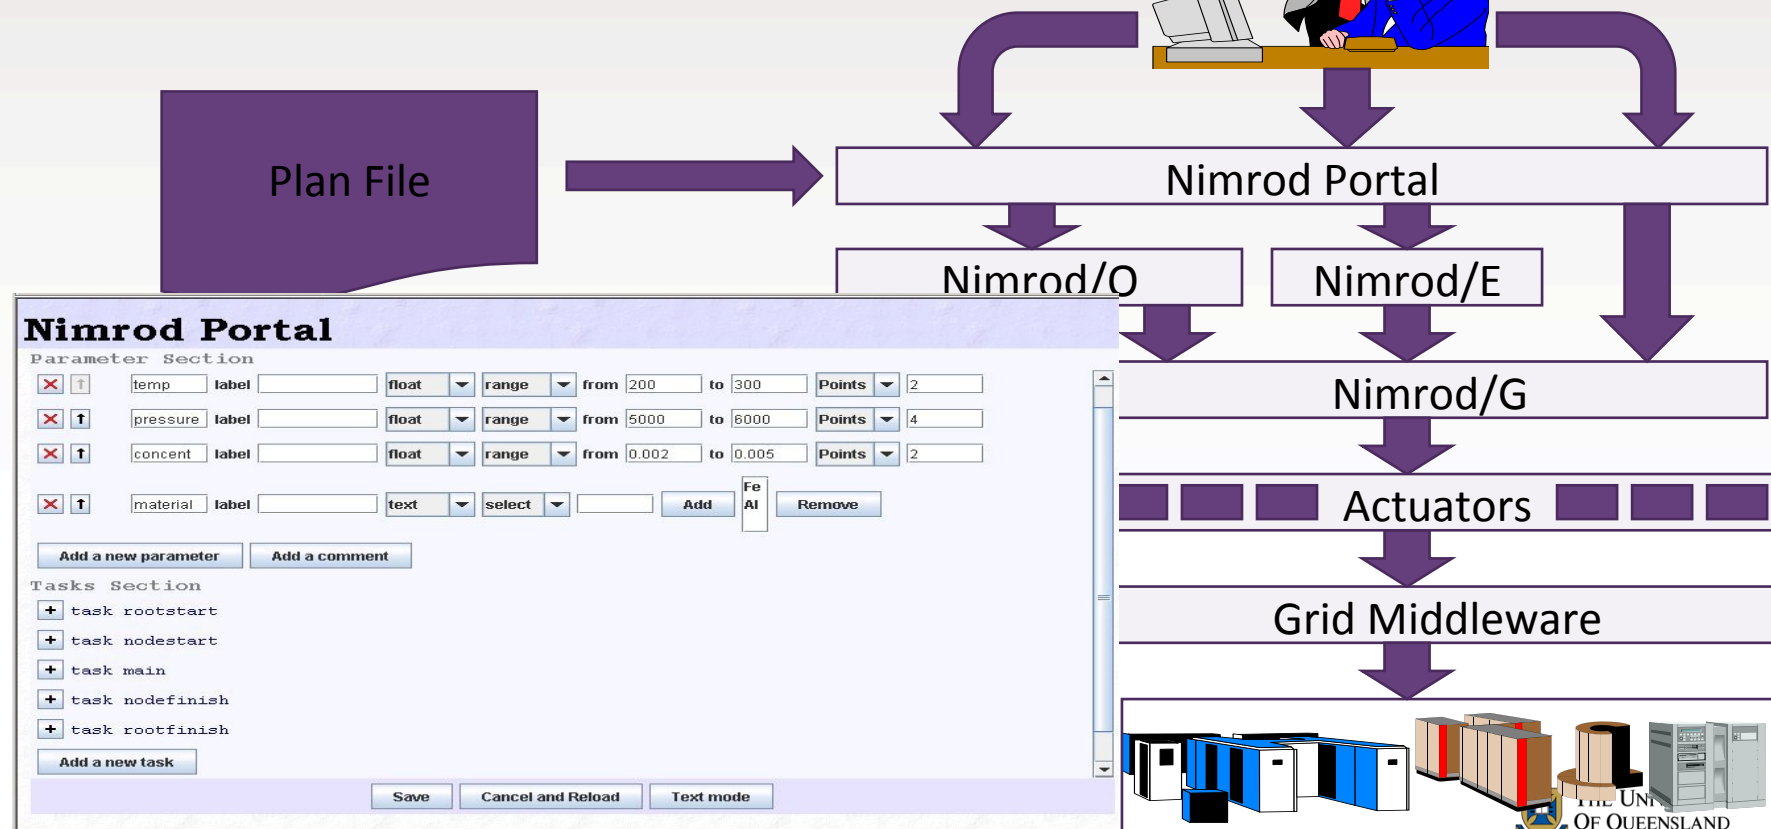

Nimrod supporting “real” science and engineering

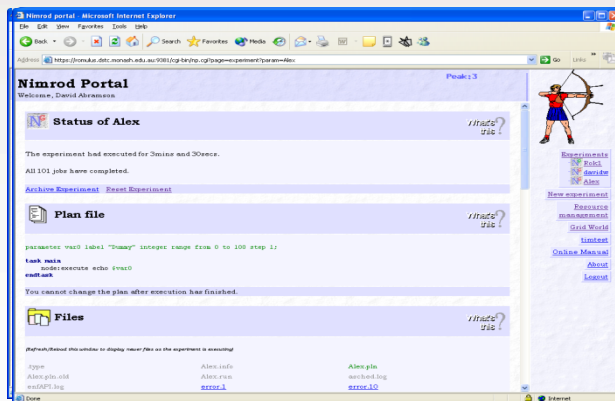

- > A full parameter sweep is the cross product of all the parameters (Nimrod/G)
- > An optimization run minimizes some output metric and returns parameter combinations that do this (Nimrod/O)
- > Design of experiments limits number of combinations (Nimrod/E)
- > Workflows (Nimrod/K)

Legacy Nimrod family

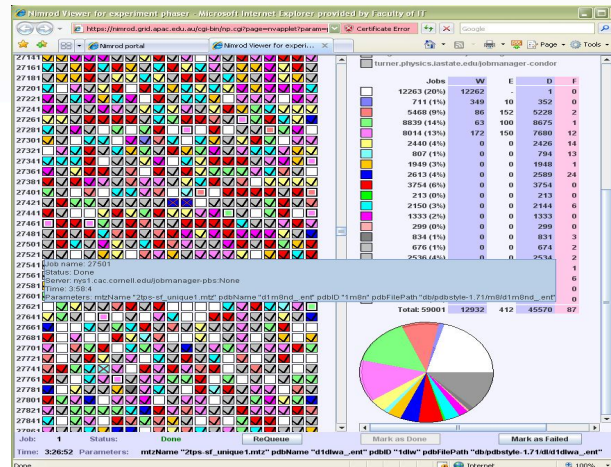

Nimrod Development Cycle

Scientific Workflows and Nimrod

rcc.uq.edu.au

Nimrod/K Workflows

- > Nimrod/K integrates Kepler with
 - > Massively parallel execution mechanism
 - > Special purpose function of Nimrod/G/O/E
 - > General purpose workflows from Kepler

Workflow Threading

- > Nimrod parameter combinations can be viewed as threads
- > Multi-threaded workflows allow independent sequences in a workflow to run concurrently
 - > This might be the whole workflow, or part of the workflow
- > Tokens in different threads do not interact with each other in the workflow

Complete Parameter Sweep

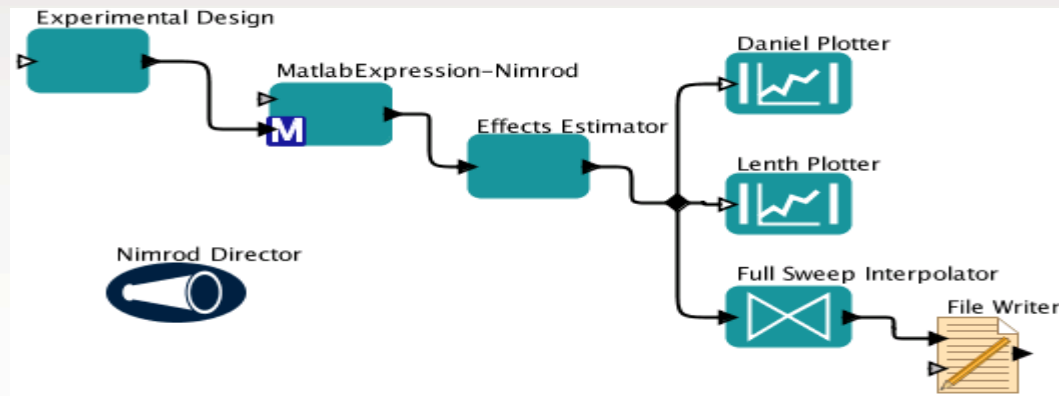

- Using a MATLAB actor provided by Kepler
- Local spawn
 - Multiple thread ran concurrently on a computer with 8 cores (2 x quads)
 - Workflow execution was just under 8 times faster
- Remote Spawn
 - 100's – 1000's of remote processes

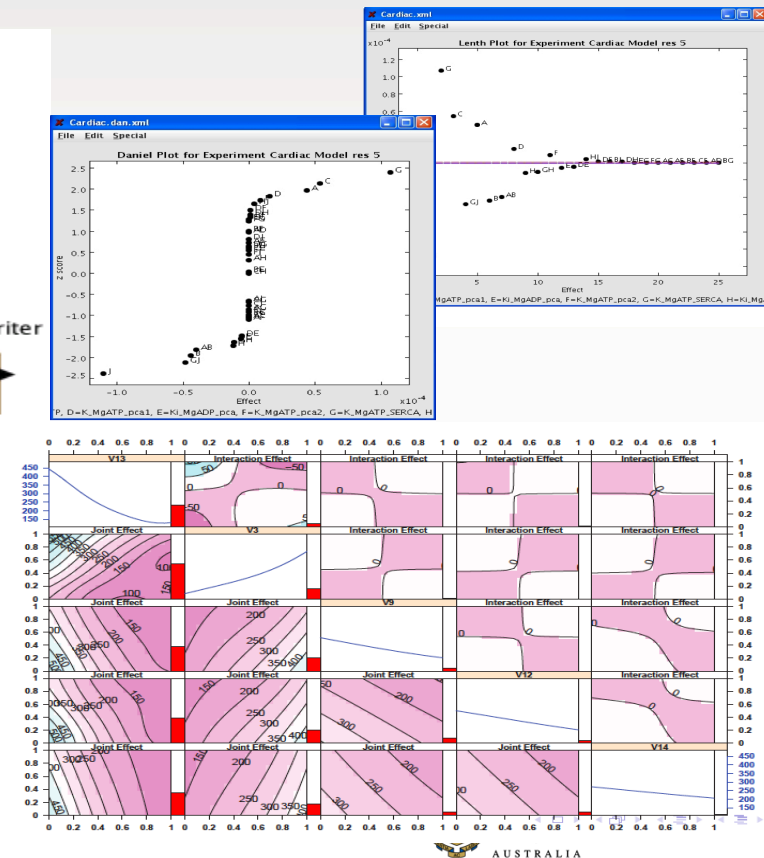

rcc.uq.edu.au

Nimrod/EK Actors

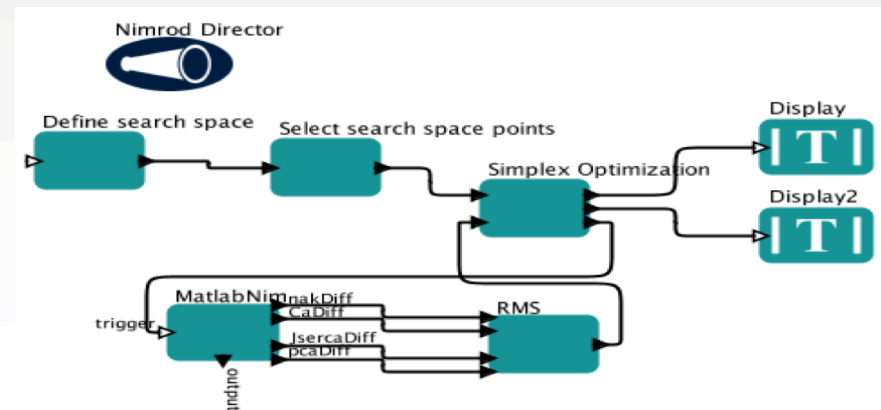

- > Actors for generating and analyzing designs
- > Leverage concurrent infrastructure

Nimrod/OK Workflows

- > Nimrod/K supports parallel execution
- > General template for search
 - > Built from key components
- > Can mix and match optimization algorithms

Interacting with Workflows

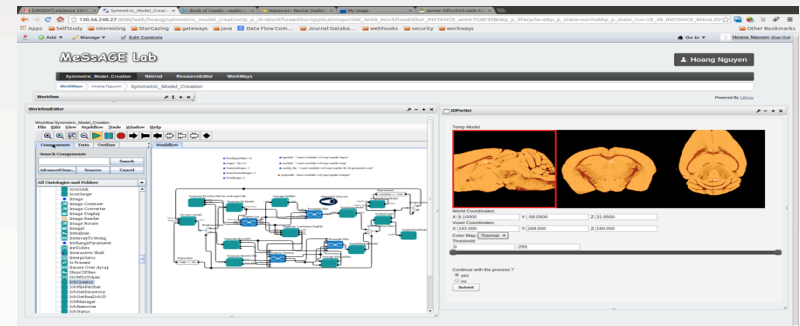

Workways (Hoang Nguyen)

rcc.uq.edu.au

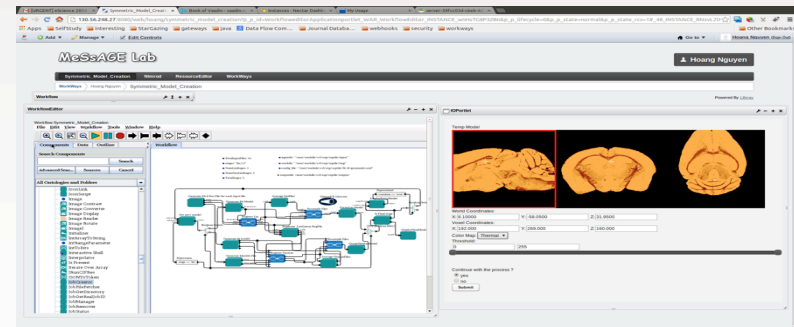

WorkWays

- > Ease of use of Science Gateway
- > Workflows as service
- > IO through portlets
- > Extensibility
 - > Different IO mechanisms, protocols and topology
 - > Different UI clients
- > Currently Kepler as the workflow engine

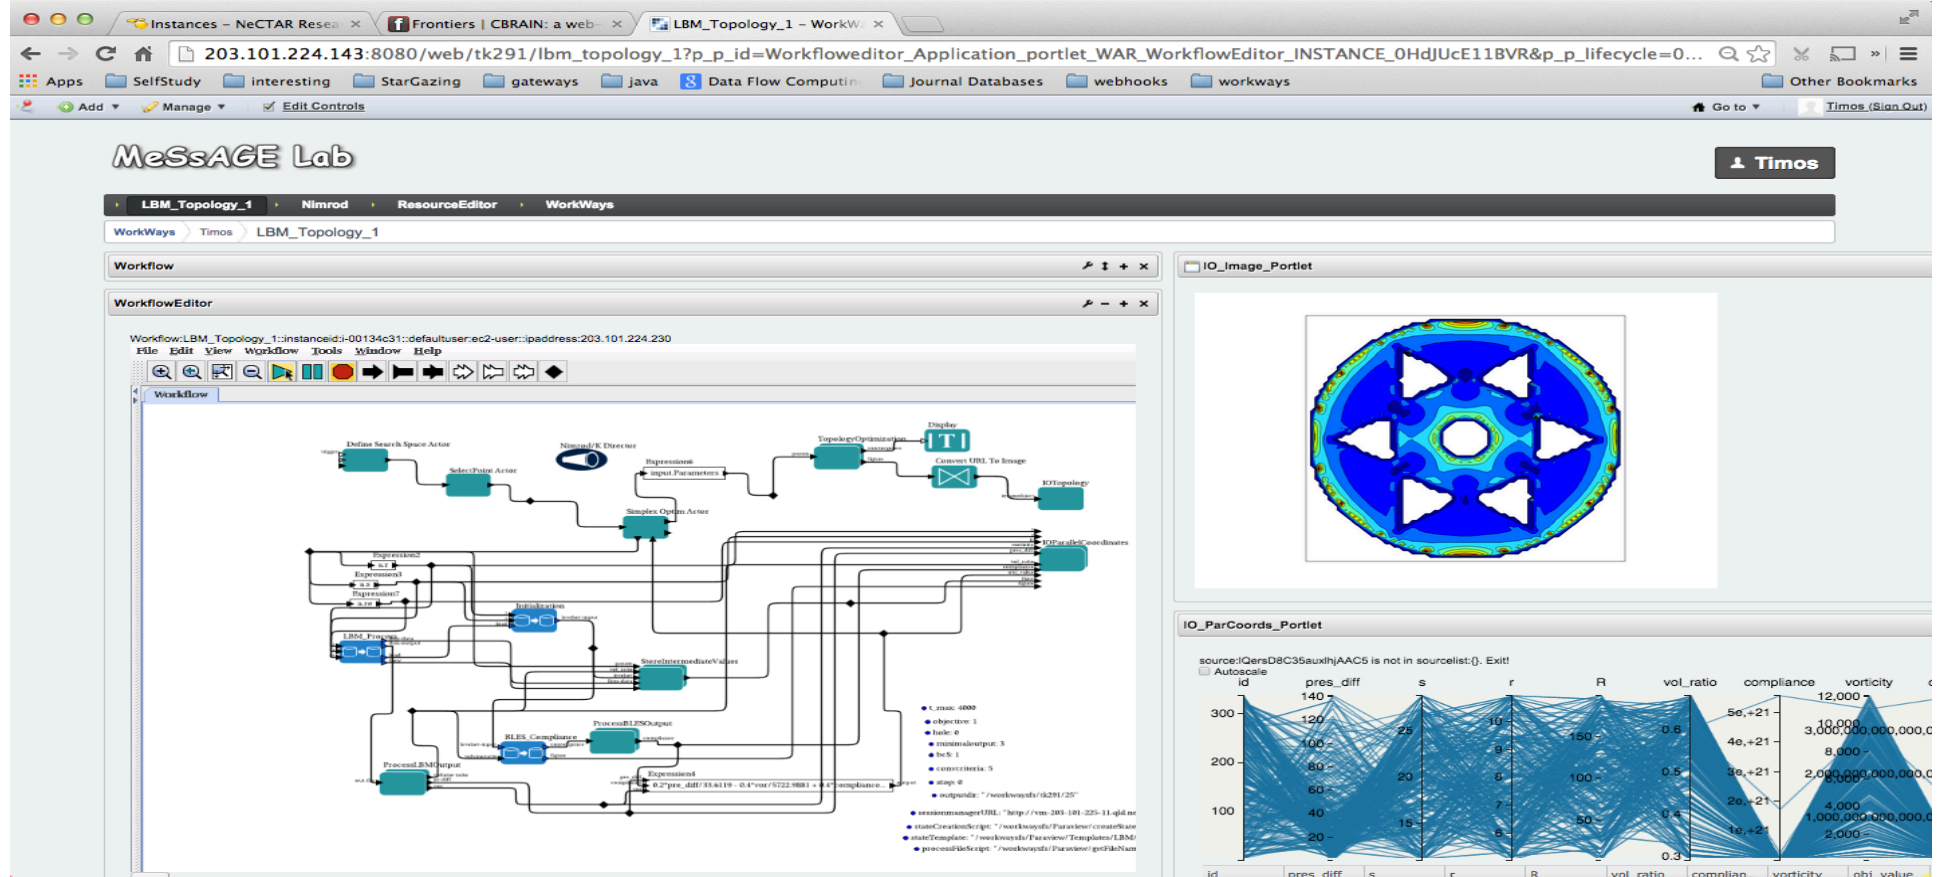

WorkWays

- > Leverage various existing technologies
 - > Kepler workflow
 - > Nimrod family toolkit
 - > Liferay portal
- > Virtual desktops
- > AAF
- > Various Web-based visualization tools
 - > Parallel coordinates
 - > Para-view Web

Micro-mixer design

Wildfires

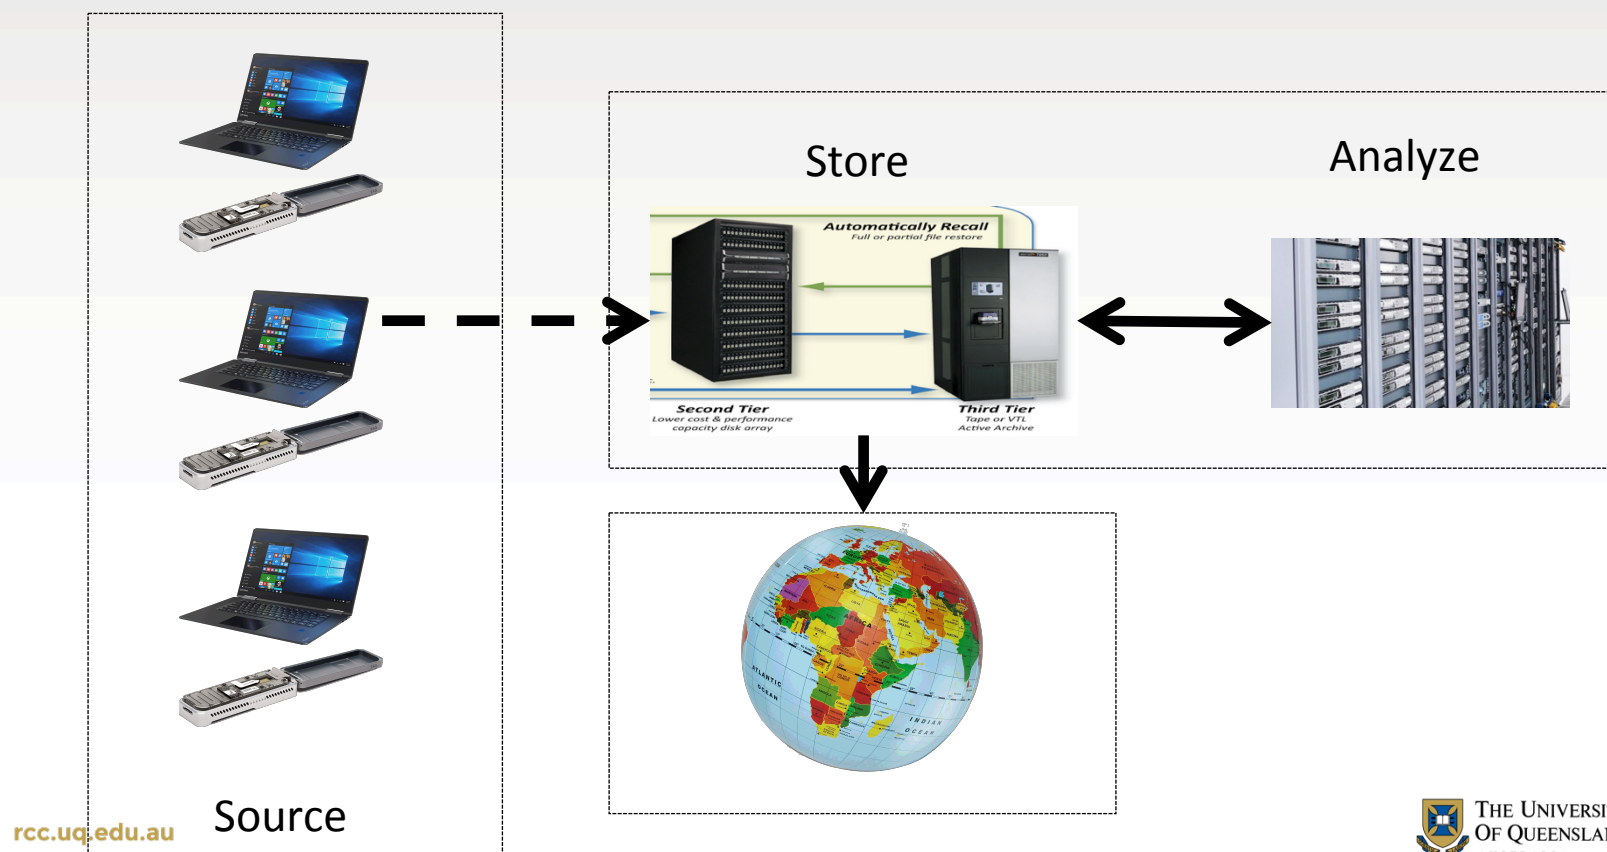

Lynch, Beringer, Uotila Monash U, AU

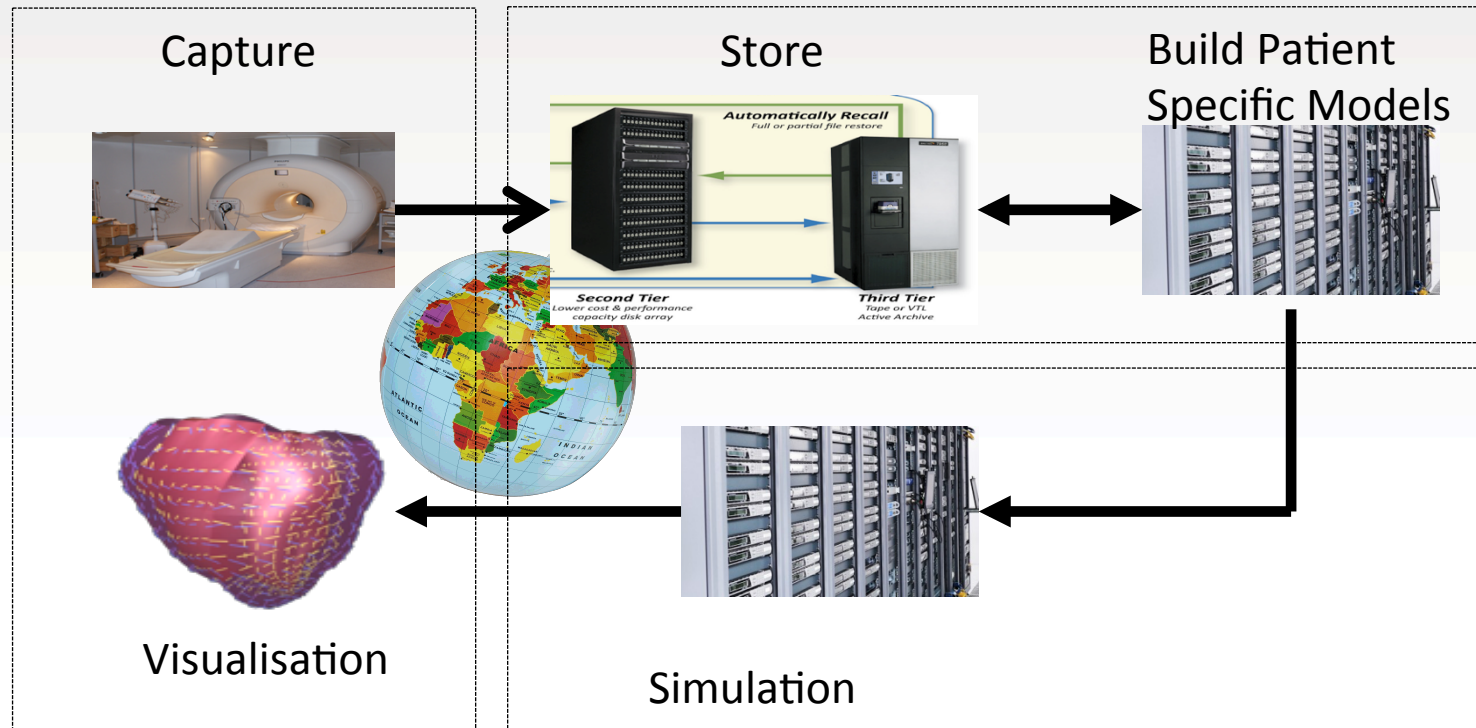

Use Case: Microscopy

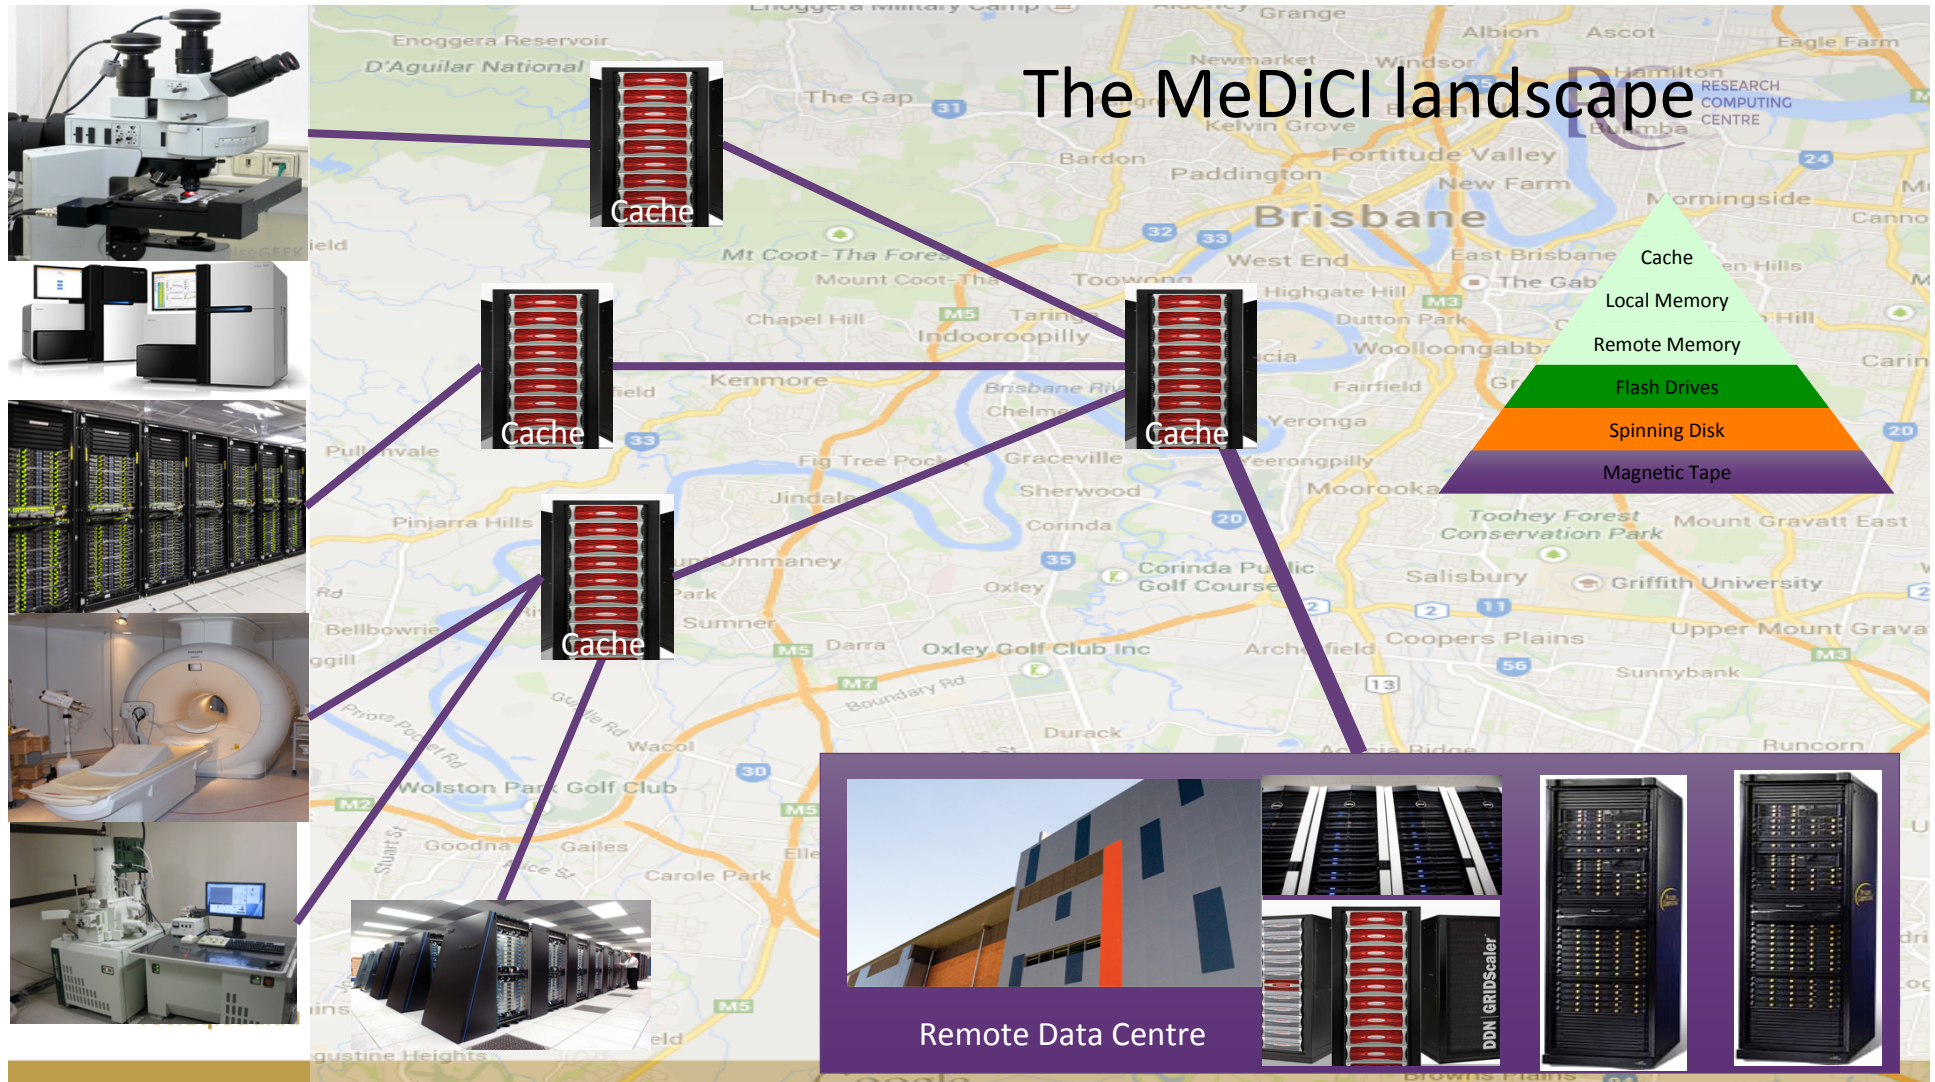

Use Case: Personal Genomics

Use Case: Cardiac Science

The MeDiCl landscape

MeDiCI unifies data access

Conclusions

- > Workflows are useful for scripting complex computational science and engineering problems
- > Conceptually easy to add optimization
- > User interaction requires new workflow actors
- > Integration to a Science Gateway allows very powerful workflows to be exposed to wider communities.
- > Placing a common file system under the workflow engine seems to be promising
